

THE SERVOPAC® FAMILY OF MACHINES

4 Models Strong

Introduced in 2008 the Servopac Family, now four models strong, has steadily revolutionized concrete products production for producers around the globe. These machines offer the **responsiveness, reliability, and versatility** to produce the ever-growing variety of concrete products demanded by today's marketplace.

Servopacs deliver maximum machine productivity with:

- Dramatically increased mold life
- Mold & Height changes in less than 15 minutes
- Besser & competitive mold capability
- Touchscreen operation for most machine controls
- Streamlined design for easier maintenance

SELECT

Introduced in 2018, the Select boasts select features from the Classic. Adapting the renowned Advanced Servo Vibration (ASV) from cam machines, the Select has two Servo motors for vibration which allow control of frequency.

Product Heights: 1" – 12" (25 – 300 mm)*
Available in 3AAT, 4AAT, 5AAT & 6AAT format.

CLASSIC

The original Servopac®, the Classic was designed for versatility of production. Quick mold and height changes, along with independent control of frequency and amplitude in the vibration system allows the Classic to produce a wide variety of products through minimal human touches. This flexibility makes it easy to integrate short runs into the production schedule. Production versatility makes the Classic the perfect machine for producers consolidating plants.

Product Heights: 1" – 12" (25 – 300 mm)*
Available in 3AAT, 4AAT, 5AAT & 6AAT format.

INFINITY

INFINITY

The newest addition to the Servopac® family, the Infinity debuts a new, patented vibration system. This system allows the machine to be set-up to run either mold or table vibration depending on the product being produced. Using either mode, the operator can adjust the frequency and amplitude independently to create the perfect vibration for each product.

Product Heights: 1" – 12" (25 - 300 mm)*
Available in 3AAT, 4AAT, 5AAT & 6AAT format.

PREMIER

The Premier is a traditional big board machine, with Besser ingenuity. It is the first and only big board machine engineered and manufactured in the United States. Standard Servo table (impact) vibration provides the operator with independent frequency and amplitude control.

Product Heights: 1" – 20" (25 - 500 mm)*
Available in half and full board sizes.

*Products lower than 1-1/2" (38 mm) tall may effect machine speed and / or result in higher cull rates. The mix design is critical in minimizing cull rate. For better viewing, all guards, safety devices and signs are not necessarily shown. Some of the equipment shown or described throughout the brochure is available at extra cost. Besser Company reserves the right to change or improve product design and specifications without prior notice. Since the time of printing, some of the information in this brochure may have been updated, ask your Besser sales representative for details.
